Team Contract

Team Name: kawai_adrien
Date: October 31, 2019

GOALS: What are our team goals for this project? What do we want to accomplish? What skills do we want to develop or refine?
Our team goal for this project is to be able to produce a practical Android application that can be used by anybody. We hopefully want to be able to create a functioning application integrated with Google Maps that displays public washrooms closest to the user. We hopefully would want to develop skills such as User Interface development, proper Object Oriented Programming design, as well as proper iterations in the project that can be comparable to industry standards.
EXPECTATIONS: What do we expect of one another in regard to attendance at meetings, participation, frequency of communication, the quality of work, etc.?
Since we do have other classes this semester, given our limited time in this project, we expect one another to respect the planned dates when we are supposed to do tasks. As much as possible, we will dedicate reasonable and ample time for this project.
POLICIES & PROCEDURES: What rules can we agree on to help us meet our goals and expectations?
1. Show up on time during meetings (in person or online). 2. In the event that one could not make it to a meeting, inform the other member about it so that adjustments can be made. 3. If one is in need of assistance, one should not hold back to ask the other about solutions to the problem.
CONSEQUENCES: How will we address non-performance in regard to these goals, expectations, policies and procedures?
Failure to meet expectations will be considered on a case-by-case basis. Continued failure to meet expectation will result to a low evaluation score.

We share these goals and expectations, and agree to these policies, procedures, and consequences.
